

Intensive School-Based Intervention

VIA's Intensive School-Based Intervention (ISBI) program is focused on helping children succeed in their local public schools. To this end, VIA partners with school divisions, providing in-clinic **services to learners** along with in-person and remote **coaching services to teachers and school staff**—all with an eye on helping students whose behavioral needs have exhausted the resources of the school district.

VIA's expertise, commitment, and professionalism have been instrumental in achieving better outcomes for our students and positive learning opportunities for the staff.
